“ We are grateful to the Washington Post, the New York Times, Time Magazine and other great publications whose directors have attended our meetings and respected their promises of discretion for almost 40 years.....It would have been impossible for us to develop our plan for the world if we had been subjected to the lights of publicity during those years. But, the world is more sophisticated and prepared to march towards a world government. The supernational sovereignty of an intellectual elite and world bankers is surely preferable to the national autodetermination practiced in past centuries.

In case of a nuclear explosion, FEMA warns to try to keep 6 ft social distance and wear a mask for covid. You can't make this up

## Nuclear Explosion

Nuclear explosions can cause significant damage and casualties from blast, heat, and radiation but you can keep your family safe by knowing what to do and being prepared if it occurs.

A nuclear weapon is a device that uses a nuclear reaction to create an explosion.

Nuclear devices range from a small portable device carried by an individual to a weapon carried by a missile.

A nuclear explosion may occur with or without a few minutes warning.

Fallout is most dangerous in the first few hours after the detonation when it is giving off the highest levels of radiation. It takes time for fallout to arrive back to ground level, often more than 15 minutes for areas outside of the immediate blast damage zones. This is enough time for you to be able to prevent significant radiation exposure.

### GET INSIDE

**Get inside the nearest building** to avoid radiation. Brick or concrete are best.

**Remove contaminated clothing and wipe off or wash unprotected skin** if you were outside after the fallout arrived. Hand sanitizer does not protect against fallout. Avoid touching your eyes, nose, and mouth, if possible. Do not use disinfectant wipes on your skin.

**Go to the basement or middle of the building.** Stay away from the outer walls and roof. **Try to maintain a distance of at least six feet between yourself and people who are not part of your household. If possible, wear a mask if you're sheltering with people who are not a part of your household.** Children under two years old, people who have trouble breathing, and those who are unable to remove masks on their own should not wear them.

If you still need a booster after being fully vaxxed... and still need to get tested after being fully vaxxed... and still need to wear a mask after being fully vaxxed... and still get hospitalized after being fully vaxxed, it's probably time that you admit that you've been conned.

« The perfect dictatorship would have the appearance of a democracy, but would basically be a prison without walls in which the prisoners would not even dream of escaping. It would essentially be a system of slavery where, through consumption and entertainment, the slaves would love their servitudes. »

**Reader - "Reading this is enlightening. It all continues!"**

" Sorcerers and witches, brought before the bar of the Inquisition, were accused of, and confessed to, the adoration of Satan, the desecration of the host and other consecrated objects, the sacrifice of infants, cannibalism, the use of human ingredients, particularly blood and fat, in their salves and potions, effecting the death of their enemies by means of waxen images baptized in their names, poisonings, all the details of what came to be a stereotyped catalogue of crimes. One cannot fail to notice especially the constant recurrence of the charge of child sacrifice in these trials, and the importance of human blood in the witches' ritual; "

We note the use of fetal DNA in a huge number of products for consumption & body products. There are 27+ temples to Satan in the US. Blood drinking is popularized by celebrities in the US along with the rise of the Spirit Cooker (witch) in fame. Cannibalism is hugely pushed now as a rational act & abortions & the sale of fetal body parts is off the charts. Gosh, I wonder why."

## **New COVID-19 guidance from CDC focuses on individual decisions**

- Those exposed to the virus are no longer required to quarantine.
- Unvaccinated people now have the same guidance as vaccinated people.
- Students can stay in class after being exposed to the virus.
- It's no longer recommended to screen those without symptoms.
